Prepared by: Cindy L. Howell

As expected, we had some IFR roll in this morning, but things should be improving. Tomorrow morning should pose no aviation hazards, as a slight wind shift will keep the stratus at bay. By Friday, a cold front will cut through the area. Unfortunately, the front will not bring us any rain, but it will cool down our temperatures and give us some gusty winds for Friday's and Saturday's AM and PM periods. Our next hope of rain comes late next week.

Note: This product is posted on Mondays, Wednesdays and Fridays NLT 1000L and is for non-operational, planning purposes only.
